## PARK FEATURES

- HOPEWELL EARTHWORK**  
This earthwork is actually a hilltop enclosure constructed nearly 2,000 years ago by the Hopewell Culture. It is a long, winding mound of raised earth about 3 to 4 feet high. Now covered in deep forest, it is easy to miss, but fascinating to those interested in history. This enclosure is known locally as Carlisle Fort.
- HIGH VIEW**  
Park at the Eby Road parking lot and venture a short distance east across the picnic area to discover a spectacular view of the Twin Creek Valley, including Germantown, Carlisle and Miamisburg. Rare grassland birds such as northern harriers, bobolinks and grasshopper sparrows make this hilltop their home.
- TWIN CREEK**  
The Twin is a beautiful and critical habitat. The Twin Creek watershed is 46.2 miles long with drainage of 316 square miles. Twin Creek is special because the quality of its fish, macro-invertebrate and physical habitat are among the highest of any Ohio stream. To learn more about the efforts to protect the Twin Creek, watch our video at [metroparks.org/twincreek](http://metroparks.org/twincreek).

Five Rivers MetroParks supports the Americans with Disabilities Act by making reasonable accommodations in serving individuals with disabilities. Programs and facilities are offered on a nondiscriminatory basis. If accommodations are needed, please call (937) 275-PARK (7275) at least one week in advance.
