

## MATURE PIGNUT HICKORY

### MATURE SIZE

**HEIGHT**  
50-60  
FEET

**SPREAD**  
25-35  
FEET

**SHAPE**  
OVAL

**GROWING CONDITIONS**  
WELL-DRAINED TO DRY SOILS

# PIGNUT HICKORY

*Carya glabra* (KAIR-ee-uh GLAY-bruh)

### ABOUT:

Found on hillsides and ridges in well-drained to dry soils. Although its nuts are usually bitter, squirrels, chipmunks and raccoons eat them.

### LEAF

5-7 leaflets that are yellow in fall

### SEED

Round nut encased in a ridged husk that partially splits open in fall

### BARK

Rounded ridges
